AI Security Copilot - Investigation Report

IOC	45.33.32.156
IOC Type	IP
Risk Score	70/100
Severity	High
Priority	Immediate Investigation

Executive Summary

The IOC 45.33.32.156 (IP) is classified as High risk with a score of 70/100. Key reasons: Medium VirusTotal malicious detections, Low AbuseIPDB abuse confidence score, SSH exposed, High severity CVE detected: CVE-2021-44224, Multiple MITRE ATT&CK; techniques mapped.

Key Observations

• VirusTotal shows 3 malicious detection(s).

• AbuseIPDB shows low-to-medium abuse confidence: 11.

• AbuseIPDB has 5 total report(s) for this IP.

• GeoIP indicates location/ISP: United States / Akamai Technologies, Inc..

• Open services detected: 22/ssh(OpenSSH 6.6.1p1 Ubuntu 2ubuntu2.13), 80/http(Apache httpd 2.4.7).

• High severity CVEs detected: CVE-2021-44224.

• Mapped MITRE ATT&CK; techniques: T1046 - Network Service Discovery, T1021 - Remote Services, T1046 - Network Service Discovery, T1595 - Active Scanning, T1190 - Exploit Public-Facing Application.

Recommended Actions

• Verify the IOC reputation using multiple threat intelligence sources.

• Monitor logs for repeated connection attempts from this IP.

• Restrict SSH access using firewall/VPN and disable password-based login.

• Review web server configuration, headers, and exposed application surface.

• Plan urgent patching for high severity vulnerabilities.

VirusTotal

Malicious: 3 | Suspicious: 0 | Harmless: 53

AbuseIPDB

Abuse Score: 11 | Country: US | ISP: Linode

Open Ports

Port	Service	Product	Version
22	ssh	OpenSSH	6.6.1p1 Ubuntu 2ubuntu2.13
80	http	Apache httpd	2.4.7

MITRE ATT&CK; Mapping

• T1046 - Network Service Discovery (Discovery)

• T1021 - Remote Services (Lateral Movement)

• T1046 - Network Service Discovery (Discovery)

• T1595 - Active Scanning (Reconnaissance)

• T1190 - Exploit Public-Facing Application (Initial Access)

Action Playbooks

Suspicious IP Reputation

This IP has abuse reports and may be involved in malicious activity.

```
Command: sudo ufw deny from 45.33.32.156
Command: sudo iptables -A INPUT -s 45.33.32.156 -j DROP
```

SSH Port 22 Exposed

Public SSH exposure may allow brute-force attacks or unauthorized access attempts.

```
Command: sudo ufw allow from YOUR_TRUSTED_IP to any port 22
Command: sudo nano /etc/ssh/sshd_config
Command: Set: PasswordAuthentication no
Command: sudo systemctl restart ssh
```

Detected Service Version: OpenSSH 6.6.1p1 Ubuntu 2ubuntu2.13

Exposed service versions may be mapped to known vulnerabilities.

```
Command: sudo apt update
Command: sudo apt list --upgradable
Command: sudo apt upgrade
```

Web Service Exposed on Port 80

Public web services can be targeted for scanning, exploitation, and misconfiguration attacks.

```
Command: curl -I http://TARGET_DOMAIN_OR_IP
Command: apache2 -v || nginx -v
Command: sudo tail -f /var/log/apache2/access.log
Command: sudo tail -f /var/log/nginx/access.log
```

Detected Service Version: Apache httpd 2.4.7

Exposed service versions may be mapped to known vulnerabilities.

```
Command: sudo apt update
Command: sudo apt list --upgradable
Command: sudo apt upgrade
```

High Vulnerability Detected: CVE-2021-44224

Apache httpd 2.4.7 may be affected by a high severity vulnerability.

```
Command: sudo apt update
Command: sudo apt upgrade
Command: sudo systemctl restart apache2 || sudo systemctl restart nginx
Command: sudo tail -f /var/log/apache2/access.log
```
